

Annata Dynamics IDMS

Rental Management Solution for Dynamics AX

Annata Dynamics Rental is a modern, fully integrated solution for Automotive, Equipment, Tools & Industrial rental/hire companies. It is built as an add-on to the Microsoft Dynamics AX ERP system and uses the standard features of Microsoft Dynamics AX, as well as extensive additional features specifically designed to support the rental business. It handles all key business processes during the entire vehicle's/equipment's lifecycle "from cradle to grave" just after and allows to analyze it in a simple and readable way using Annata Analytics tools.

Annata Analytics

Providing you with a 360° view of your vehicles/equipment

Rental

- **Asset fleet management**
Full 'cradle to grave' lifecycle management of the vehicle / equipment fleet.
- **Advanced rental asset classification and search**
Find rental vehicle / equipment based on extensive classification / property options.
- **Availability and reservation planning**
Gantt view with 'Real time' asset availability.
- **'Shopping basket' functionality**
Handle enquiries, raise rental quotations and orders with user friendly 'step by step' process.
- **Advanced allocation and replacement**
Use different asset allocation, upgrade and replacement options.
- **Accessories and consumable sales support**
Offer rental accessories or additional services and add them to rental orders e.g. navigation system or fuel management.
- **Link to projects**

Invoicing

- **Rental credits**
Credit your rentals in case of variations.
- **Periodic invoicing**
Use periodic collection functionality which allows to collect fees periodically for long term rentals.
- **Rental alterations**
Use to credit or adjust the rental price: for non-chargeable days or periods where extra charges need to be applied.

Return

- **Flexible charging methods**
Charge by time period or by usage, with excess usage charge option at higher rates
- **Periodic invoicing**
Use of periodic collection functionality enables collection of fees periodically for long term rentals. Combine collections onto a single invoice for multiple rental orders to one customer.
- **Interactive inspections**
Carry out rental asset delivery / return inspections and create service orders to cover inspection failures.
- **Lost and found handling**
Register and search for lost and found items.
- **Transfer between locations**
Transfer rental vehicles / equipment between locations e.g. different branches or inspection/service workshops. Track asset location and transfer status.
- **Periodic inspections**

Service

- **Workshop resource planning and management**
Control your human resources, plan work and manage the service order allocation.
- **Maintenance plan templates**
Set up a maintenance plan structure and assign it to rental assets.
- **Asset recalls**
Ensure the safe use of vehicles / equipment through comprehensive asset recall functionality
- **Rental asset history**
Log your asset history, including usage, service orders, claims etc. Snapshot view of 'wet' and 'dry' performance of your assets.
